Lincolnshire Technology Hubs

The Technology Hubs provide an environment where businesses are given the opportunity to use state-of-the-art equipment, as well as having the option to take advantage of workshops and other advice. The hubs can help you to create a prototype product, develop a new service or provide a greater level of detail to help improve your production lines.

www.businesslincolnshire.com

Horncastle Hub

- 3D printers, 3D colour scanners and a laser cutter
- UV printer, 2 and 4 axis milling machines
- Oculus 1 Rift virtual reality glasses and Go Pro 360
- Workshops and advice on how to use the equipment or approach your project
- The chance to test drive cutting edge technology to see how it would benefit your business
